1931 - 1981

CLASS 1900

POSTAL DEVICE

On August 5, 1930, the USPOD authorized the NCR Corporation to produce taped meter stamps for use on Parcel Post Mail.

The Class 1900 Register was initially used at the home office in Dayton, Ohio on January 17, 1931.

Domestic and Foreign acceptance of these meter machines and stamps resulted in their use on all classes of mail.

In the 1960-1970 decade, corporate competition demonstrated that mechanical stamp production had entered The Electronic Era.

The NCR Company responded by authorizing a subsidiary, The Electronic Communications, Inc., Flushing, N.Y., to manufacture on trial "an electronic meter stamp device." The "Pilot Trial" stamps appeared on August 8, 1974 and were discontinued in late 1981.

Featured characteristics, rates, and usages of the stamps in North America and Foreign countries are displayed in the Exhibit.

There are three short horizontal lines to each lower corner at the sides of the town name. The line above the town name does not extend to the sides. Sanserif inscriptions. Meter number is large in size.

HISTORICAL BACKGROUND

The NCR Company was the first to produce a key-numbered, self-service, coin operated meter device to print and sell adhesives for application to a postal item by the purchaser.

In early 1971, one such machine was placed in the AUSTIN, TEXAS Post Office. It was contained in a cabinet five feet tall by two feet wide and was used a few months for Parcel Post needs.

A limited number of stamps are known, mint and used.

TERMINAL INDICIA MACHINES

The company manufactured the initial computerized omni-denominational Postage Accounting Systems and Stamps.

These devices were introduced on a trial basis, at the Flushing, NY (BAR TERRACE) Post Office, August 8, 1974. The "Pilot Program" was terminated in 1981.

Subsequent electronic circuitry produced the present day Integrated Retail Terminals (IRTs) and Postage Validation Imprinters (PVI's).

The following stamps represent the precursors of the IRT/PVI labels in use at modern Post Office window operations.

STAMP DESIGN

"U.S. EAGLE" placed at left.

"U.S. POSTAGE, TOWN NAME, STATE, AND ZIP CODE" are located at right.

NCR Meter, Number, Date, and Value placed at bottom of stamp.

Imprints were made on thin 'white' adhesive paper in shades of violet and purple inks.

Outer 'Frame Line', rounded (1976), squared (1978). UL/UR.

INDICIA is fluorescent.

PROJECT PROFILES

Two Letter/Number types were printed: (1) Large (3.0 mm), and (2) Small (2.5 mm).

"NCR"	1.0, 1.5, 2.0 mm
"VALUE"	1.5, 2.0 mm
"METER NUMBERS, DATE, VALUE"	2.5, 2.75 mm

IN REPLY
REFER TO:
YOUR
REFERENCE:

P.O. Cl. _____

TO: Gabriel Pustel
34 Laurelton Ave.
Jackson, N.J. 08527

In reply to your letter of 2/12/75, the following information is furnished you in regard to the NCR Terminal's now being used in the Flushing arear on a pilot basis.

First Post Office was Bay Terrace, 8/8/74, 29 stations, 18 carrier stations and 11 Finance Stations, 54 Terminals are in operation, each station has an assigned number, tapes are not luminous of phosphorence and the local NCR is in Rego Park, N.Y. 11374

Enclosed you will find one tape with my compliments because no zero tapes are issued, a sale has to take place because of the possible volume of Philatelic collector's involved.

BASIC SERVICES

2.8 - 3.8

RATES, ROUTES, USAGES

The USPS handles mail in many ways. Four classes are utilized. Post and Postal Cards, Domestic Letters, and Air Mail are handled in the First Class manner. Second Class mail is applied to publications printed at regular intervals at least four times a year. Third Class mail contains material not required to be posted at First or Second Class restrictions. Fourth Class mail is used for Parcel Post with defined variations.

SPECIAL SERVICES

4.0 - 4.8

Special Delivery, Registry/Insured, Return Request, and Restricted Delivery are included in these categories. Additionally, Third and Fourth Class mail is used with Insured and C.O.D. pieces and parcels.

The NCR Stamps and Usages (1931-1981), Domestic and Foreign, Surface and Airmail, are verified on the following pages.

Office of the State Entom.
Ste. "A," Ames, Iowa
Sept. 1, 1955

NURSERY INSPECTION

CERTIFICATE OF

This certifies that the nursery premises and growing nursery stock consisting of general line of nursery stock, Bulbs, Raspberries and Strawberries doubly inspected and belonging to Inter-State Nurseries, Hamburg, Iowa, have been inspected by a duly authorized nursery inspector as provided by "The Iowa Crop Pest Act"—Chapter 201.1, Code of Iowa, 1955.

Permission is hereby granted to the above named nursery to sell and ship (1) stock of his own growing which upon inspection has either been found apparently free from dangerously injurious insect pests and plant diseases, or if diseased, has been treated or prescribed by this office, and (2) stock obtained from other sources approved by this office, provided that a tag on which a copy of this certificate has been printed, is attached to each package, bale, box or car load of shipped or delivered.

This certificate applies only to stock which has been officially inspected for this year ending September 1, 1956, and expires on that date, but may be revoked by the State Entomologist at any time for cause.

USPO FORM 3817

FORM 3817 initially became available for only fourth-class parcels.

The NCR STAMPS dated April 3, 1952 indicate a request and payment by the Sender of the 1¢ Fee (1915-1955) for each lot with no provision for indemnity.

These pieces illustrate "Duplicate Certificates", original and duplicate, that became available on July 1, 1929.

POSTAGE METERS

The NCR multi-denominational machines were used in Canada from 1925 to 1973. Initially, two types were used in Post Offices for Parcel Post Mail. Subsequently, they were utilized on letter and Postage Due envelopes.

TYPE PP.1.

CLASS 1100 MODEL produced Upright Rectangular 28 x 85 mm stamps.

Sub-types PP. 1A, 1B, 1C were used.

TYPE PP.2.

CLASS 1900 MODEL created Rectangular 54 x 46 mm stamps.

Sub-types PP. 2A, 2B, 2C, 2D were employed.

POSTAGE DUE

Machines were available in CLASS 1100 and 1900 Models.

Sub-types PD. 1, 2, 3 have been identified.
